ABSTRACT

This supplementary document provides the base-model checkpoint identifiers (Table S1) for the three backbone models used in this study. Weights are publicly available on the Hugging Face Hub at the repository identifiers listed below.

Table S1
HuggingFace Hub repository identifiers for the three base-model checkpoints used in this study. Weights are publicly available and can be obtained via `AutoModelForCausalLM.from_pretrained(repo_id)`.

Backbone	HuggingFace repository identifier
Qwen 2.5-1.5B-Instruct	Qwen/Qwen2.5-1.5B-Instruct
Gemma 3 1B IT	google/gemma-3-1b-it
Gemma 4 E2B IT	google/gemma-4-E2B-it

Table S1: Base-Model Repository Identifiers

All three backbones were retrieved from the Hugging Face Hub using `AutoModelForCausalLM.from_pretrained(repo_id)` without an explicit `revision=` argument. Weights can be obtained from the identifiers below; the exact snapshot loaded is determined by the HuggingFace cache state at execution time. These identifiers are also listed in `configs/checkpoints.yaml` of the replication package (Zenodo DOI: [10.5281/zenodo.23146342](https://doi.org/10.5281/zenodo.23146342)).
