Dear Dr. Yu,

Please find enclosed the production files for our manuscript:

Effective Training Pressure Gates Recursive Knowledge Degradation in LLMs: A Multi-Axis Dose-Response Study
Ms. Ref. No.: KNOSYS-D-26-21490R1

Following your acceptance letter of October 14, 2026, we are submitting the LaTeX source files, figure files, updated Highlights, and a point-by-point Response to Reviewers addressing the three questions raised by Reviewer 1.

One minor textual change was made to the manuscript relative to the version accepted on September 10, 2026: two sentences were added to Section 2.4 (Parameter-efficient fine-tuning and forgetting) to compare the sequential-task forgetting addressed by Wen et al. (2024) with the recursively replaced data stream studied in this work, as requested by Reviewer 1. No other changes were made to the scientific content, results, or conclusions.

The submitted files include:

- LaTeX source files (manuscript, bibliography, shared macros, table bodies, and supplementary material) as a single ZIP archive.
- Figure files in PDF, PNG, and TIFF formats at 300 DPI.
- Updated Highlights corrected to reflect the final experimental findings.
- Response to Reviewers addressing Reviewer 1's three questions (Reviewer 2 had no further concerns).

We thank the editorial team and both reviewers for their thorough and constructive engagement throughout the review process.

Respectfully submitted on behalf of all authors,

Julio Leite Azancort Neto
